

INTAKE REASONS

In 2023 we saw a large increase of stray animals come through our doors. This number does not indicate that there are more strays than normal, it's indicative of creating an adoption program that reduces barriers, increases quality of life of the pets in our care, reduces the pets length of stay, and, in turn, that has allowed us to be able to take in more animals.

We also implemented programs that lowered our average length of stay (the amount of time an animal is in our program) from 270 days to 12 days. In conjunction with our updated adoption procedures, we built a program that reduces barriers, invites people into our facility, and creates a welcoming environment for both people and pets. All in all, we intend to see this number grow as we enhance our programs even more.
